Subject: Rossetti letter -- Re: WG Trestle: a little help, please

To Whom It May Concern,

I support the "San José Parks Foundation for Willow Glen Trestle" grant application "to Research and Document the History of the Willow Glen Trestle."

The trestle is valuable because it was connected to the valley's canneries. The trains on that trestle took foods all over the country and world, and is a big part of how this valley started. It wasn't always Silicon Valley. The valley was rich before this but in a different way, as a thriving fruit-producing area. The trestle helps open the eyes of the public to this history. The existing trestle should be documented, publicized, kept, restored and made for use by everyone.
