SUPERIOR COURT OF CALIFORNIA
COUNTY OF SANTA CLARA
UNLIMITED JURISDICTION

WILLOW GLEN TRESTLE
CONSERVANCY, an unincorporated
association; FRIENDS OF THE WILLOW
GLEN TRESTLE, an unincorporated
association,

Petitioners,

v.

CITY OF SAN JOSE; CITY OF SAN JOSE
DEPARTMENT OF PUBLIC WORKS;
CALIFORNIA DEPARTMENT OF FISH
AND WILDLIFE; and DOES 1 to 10;

Respondents.

Case Number: 18CV335801

**CITY OF SAN JOSE'S
MEMORANDUM OF POINTS AND
AUTHORITIES IN OPPOSITION TO
RENEWED MOTION FOR
PRELIMINARY INJUNCTION**

Date: June 10, 2019

Time: 2:00 p.m.

Dept: 5

Judge: Hon. Thomas E. Kuhnle

Does 1 to 10;

Real Parties in Interest.

I. INTRODUCTION..... 5

II. BACKGROUND..... 6

 1. The Project and attempts at its implementation 6

 2. Friends’ previous unsuccessful CEQA lawsuit to halt the Project..... 7

 3. Neither Petitioner nor anyone else challenged the 2015 EIR that specifically analyzed whether the trestle was a historic resource. 7

 4. This Court’s order on Petitioners’ first motion for a preliminary injunction 7

III. ARGUMENT 8

 A. Petitioners have failed to follow the requirements for a renewed motion. 8

 B. Standards of review..... 9

 1. Standard of review on a motion for a preliminary injunction favors public entities. 9

 2. The merits are reviewed under the substantial evidence test. 10

 C. The Streambed Alteration Agreement did not involve a discretionary approval in 2018..... 11

 1. Executing the Streambed Alteration Agreement in 2018 is not a subsequent discretionary approval requiring additional CEQA analysis because the terms were already approved in 2014. 11

 2. The terms of the Streambed Alteration Agreement were not negotiated. 13

 3. The issue of the trestle’s historic status was extensively analyzed in the 2015 EIR and remained unchallenged so it was not new information or substantial change circumstances of the Project in 2018. 14

 D. The balance of harms weighs against a preliminary injunction. 15

 1. Petitioners’ burden to show irreparable injury is heavier when injunctive relief is sought against a public entity..... 15

 2. The City would suffer irreparable harm if it is unable to complete the Project at this time. 16

I. INTRODUCTION

This case concerns a CEQA challenge to a Streambed Alteration Agreement, a permit issued to the City of San Jose as part of its Project, a component of the City’s Three Creeks Trail system. Petitioners’ renewed motion for a preliminary injunction should be denied because they failed to comply with statutory requirements for renewed motions. Petitioners also cannot satisfy the standard for preliminary injunctions because they are unlikely to prevail on the merits.

Petitioners renew their motion for preliminary injunction without complying with the requirements of Code of Civil Procedure section 1008(b) for motion renewals. Under that section, this Court lacks jurisdiction to consider the renewed motion. Even if Petitioners had complied with section 1008, they fail to state any new or different facts, circumstances or law from what this Court already considered and analyzed in October 2018. That alone is a ground for denial of this motion.

Petitioners attempt to bootstrap the issuance of this permit into an additional environmental review regarding the historical nature of the trestle, but they are unlikely to prevail on the merits of their case because, contrary to their argument, the City did not take any subsequent discretionary approval requiring any additional environmental analysis under CEQA. The administrative process of entering into the Streambed Alteration Agreement in 2018 is to simply implement a Project that was already approved by San Jose City Council in 2014. All required CEQA analysis and clearance was completed in 2014 as part of the Project approval and the sufficiency of the 2014 environmental clearance has been fully litigated. Even if the Court determines that the City did take subsequent discretionary approval requiring additional environmental analysis under CEQA, none of the circumstances set forth in Public Resources Code section 21166 apply to the facts of this case. The issue of whether the trestle is a “historic structure” has been fully analyzed, studied, and reported upon for over ten years in various reports and environmental documents, including the City Council approved Mitigated Negative Declaration in 2014 and Environmental Impact Report in 2015 for this Project.

The facts, circumstances, and law are the same now as they were in October 2018 when this Court denied Petitioners’ previous motion for a preliminary injunction. The Streambed Alteration

1 Agreement is unchanged and the law is unchanged. The trestle was listed in the State Register of
2 Historic Resources then and so it is now. There is no reason for a different decision.

3 The City respectfully requests the Court to deny Petitioners' motion.

4 II. BACKGROUND

5 1. The Project and attempts at its implementation

6 The City approved the Three Creeks Trail Pedestrian Bridge project ("Project") in 2014
7 based on a Mitigated Negative Declaration (Second Request for Judicial Notice filed on October 5,
8 2018 ("Second RFJN") Exhs. F & G), and then again in 2015 based on an environmental impact
9 report. (*Id.* at Exhs. I, K & M.) The Project consists of removal of a wooden railroad trestle bridge
10 and replacing it with a new, steel truss pedestrian bridge to service the City's trail system. (Request
11 for Judicial Notice filed on October 5, 2018 ("First RFJN"), Exhibit A.) The Project was awarded to
12 Gordon N. Ball, Inc. (Declaration of Katherine Brown in Opposition to Renewed Motion for
13 Preliminary Injunction ("Second Brown Decl.") at ¶4.)

14 Because the work requires entering the Los Gatos Creek, four permits were required,
15 including a streambed alteration agreement ("Agreement" or "Permit") from the California
16 Department of Fish and Wildlife ("State" or "Department").

17 After receiving the Permit from the State on October 4, 2018, the City had all the needed
18 permits (i.e. from the Regional Water Quality Control Board, the U.S. Army Corps of Engineers,
19 and National Oceanic and Atmospheric Administration) and was ready to commence working on the
20 Project. (Declaration of Katherine Brown in Support of City of San Jose's Opposition to Plaintiffs'
21 Application for TRO and Preliminary Injunction, filed on October 5, 2018 ("First Brown Decl.") at
22 ¶3.) The permits allowed work only during the dry season, from June 15 to October 15. (*See*
23 Declaration of Michael O'Connell in Support of Oppositon to TRO and Preliminary Injunction filed
24 on October 5, 2018, at ¶4.)

25 When this Court issued its Order Denying Preliminary Injunction on October 11, 2018, only
26 four days remained until the expiration of the allowed work period. That was insufficient time to
27 mobilize crews to begin work. (Second Brown Decl. at ¶17.) The City therefore applied to the
28 permitting agencies for extensions to work after October 15. (*Id.*) One of the permitting agencies, the

1 Unites States Army Corps of Engineers, did not agree to an extension and the City could not
2 commence work in 2018. (*Id.*) Due to the delay caused by Petitioners' litigation of their first motion
3 for a preliminary injunction the City was unable to proceed with the Project before the permit
4 window closed on October 15, 2018. (*Id.*) The work windows in all permits expired on October 15,
5 2018. (Second Brown Decl. at ¶15.)

6 The City currently has all the required permits for work in the Creek and the dry season
7 when work in the creek is allowed starting June 15, 2019 and ending October 15, 2019. (*Id.* at 22.)
8 Work in the Creek is anticipated to end or or shortly before October 15, 2019. (*Id.* at ¶¶24-29.)

9 **2. Friends' previous unsuccessful CEQA lawsuit to halt the Project**

10 In 2016, the Sixth District Court of Appeal vacated the trial court's judgment and remanded
11 the case to "determine whether the City's adoption of the MND is supported by substantial evidence
12 that the Trestle is not a 'historical resource' under CEQA." (*Friends of the Willow Glen Trestle v.*
13 *City of San Jose* (2016) 2 Cal.App.5th 457, 473-74.) On remand, in 2017, the trial court issued a
14 judgment in favor of the City, denying Friends' petition and finding that the records contained
15 substantial evidence to support the City's decision that the trestle is not a historical resource. (First
16 RFJN, Exhibit A at 31.) That judgment is final.

17 **3. Neither Petitioner nor anyone else challenged the 2015 EIR that specifically**
18 **analyzed whether the trestle was a historic resource.**

19 While the case was pending in trial court, the City prepared an EIR for this Project (in an
20 abundance of caution and to avoid further delay if the trial court sided with the challengers),
21 including a detailed analysis whether the trestle is a historic resource under CEQA. (First RFJN
22 Exhibit B at ¶¶5-6 & accompanying exhibits.) The City Council certified the final EIR and adopted
23 it in May 2015. (*Id.*) That EIR was unchallenged, by Petitioners or anyone else. At the same time,
24 the City reapproved the Project by affirming the construction contract with Gordon N. Ball, Inc., for
25 the Project. (First RFJN Exhibit C (agenda item 4.5(b).))

26 **4. This Court's order on Petitioners' first motion for a preliminary injunction**

27 In early October 2018, Petitioners applied for a preliminary injunction in this case. After
28 briefing and a hearing on the motion, this Court denied Petitioners' motion on October 11, 2018,

1 finding that while “the balancing of the relative interim harm to the parties from issuance or
2 nonissuance of the injunction weighs in favor of Petitioners” (Order Denying Preliminary Injunction
3 filed October 11, 2018 (“Order”) at 4:9-11), and while on the issue “whether the Listing presents
4 ‘new information’ or ‘substantial changes with respect to the circumstances under which the project
5 is being undertaken’” “Petitioners’ position may have merit, but it is not strong” (*id.* at 5:7-8 &
6 5:23), ultimately the Court denied Petitioners’ motion because “the finalization of the SAA
7 [Streambed Alteration Agreement] was not a ‘further discretionary approval on that project.’” (*Id.* at
8 6:27-28.) The Court found that “the finalization of the SAA did not change the activity to be
9 undertaken” because the mitigated negative declaration the City adopted in 2014 and upheld by the
10 Superior Court on remand “agreed the City would abide by conditions imposed on it in the SAA,”
11 “the City agreed in January 2014 that it would be bound by an SAA, and that decision was final.”
12 (Order at 7:11-12 & 4-6.)

13 III. ARGUMENT

14 A. Petitioners have failed to follow the requirements for a renewed motion.

15 Code of Civil Procedure section 1008(b) requires parties wishing to renew a previously
16 denied motion to follow specific procedure. (Code Civ. Proc. §1008(b).) Otherwise, the court lacks
17 jurisdiction to consider a renewed motion. (Code Civ. Proc. §1008(e).) Petitioners’ renewed motion
18 may not be heard because they failed to follow this mandatory procedure.

19 Section 1008 states that “[t]his section specifies the court’s jurisdiction with regard to . . .
20 renewals of previous motions.” (Code Civ. Proc. §1008(e).) It provides: “No application . . . for the
21 renewal of a previous motion may be considered by any judge or court unless made according to this
22 section.” (*Id.*) The Code specifies the requirements for renewals of motions:

23 A party who originally made an application for an order which was refused in whole
24 or in part, or granted conditionally or on terms, may make a subsequent application
25 for the same order **upon new or different facts, circumstances or law**, in which
26 case it shall be shown **by affidavit** what application was made before, when and to
27 what judge, what order or decisions were made, and **what new or different facts,
28 circumstances, or law are claimed to be shown.** For a failure to comply with this
subdivision, any order made on a subsequent application may be revoked or set aside
on ex parte motion.

(Code Civ. Proc. §1008(b).) (emphasis added)

1 Here, Petitioners fail to provide any affidavit in support of their motion, much less an
2 affidavit that identifies what purportedly new or different facts, circumstances or law exist since
3 their previous motion for a preliminary injunction was heard.

4 In their previous motion for a preliminary injunction, Petitioners argued, like in this renewed
5 motion, that it was the “listing” of the trestle in the State Register that allegedly triggered
6 subsequent CEQA review. (*See* Petitioners’ Supplemental Memorandum of Points and Authorities
7 in support of Injunctive Relief filed on October 5, 2018, at 3:16-25.) This Court has already made a
8 decision based on that fact and circumstance. (*See, e.g.* Order Denying Preliminary Injunction filed
9 October 11, 2019, at 3:25-4:1.) There has been no change in the law, and Petitioners do not suggest
10 any such change by affidavit or in their motion.

11 Even if Petitioners had complied with section 1008 of the Code of Civil Procedure, and this
12 Court had jurisdiction to consider their renewed motion, it should be summarily denied. The
13 circumstances, material facts and the law are unchanged since October 2018 when they brought
14 their previous motion. And no new or different facts, circumstances, or law are asserted in this
15 renewed motion.

16 **B. Standards of review**

17 **1. Standard of review on a motion for a preliminary injunction favors public**
18 **entities.**

19 In *Tahoe Keys Property Owners’ Association v. State Water Resources Control Board*
20 (1994) 23 Cal.App.4th 1459, the court articulated the standard for issuing injunctive relief as
21 follows:

22 In determining whether or not to issue a preliminary injunction, a trial court must
23 evaluate two interrelated factors. The first is the **likelihood that the plaintiff will**
24 **prevail on the merits at trial.** The second is the **interim harm the plaintiff may**
25 **suffer if the injunction is denied as compared to the harm that the defendant**
26 **may suffer if the injunction is granted.**

27 *Id.* at 1470-71 (citation omitted) (emphasis added). (*See also San Francisco Newspaper Printing*
28 *Co., Inc. v. Superior Court (Miller)* (1985) 170 Cal.App.3d 438, 442.) (A preliminary injunction
must not issue unless it is “reasonably probable that the moving party will prevail on the merits.”)

1 A plaintiff who seeks an injunction against a public entity bears a heavier burden than a
2 plaintiff under other circumstances:

3 Where, as here, the defendants are public agencies and the plaintiff seeks to restrain
4 them in the performance of their duties, public policy considerations also come into
5 play. **There is a general rule against enjoining public officers or agencies from**
6 **performing their duties.** This rule would not preclude a court from enjoining
7 unconstitutional or void acts, but **to support a request for such relief the plaintiff**
8 **must make a significant showing of irreparable injury.**

9 (*Tahoe Keys Property Owners' Assoc.*, 23 Cal.App.4th at 1471) (citations omitted) (emphasis
10 added).

11 **2. The merits are reviewed under the substantial evidence test.**

12 Petitioners advocate the wrong standard of review under Public Resources Code section
13 21166. (*See* Petitioners' Renewed Motion for Preliminary Injunction ("Renewed Motion") at 6-8.)
14 Because the City approved the Project on the basis of an EIR, the standard of review used in those
15 circumstances applies. (City's Request for Judicial Notice filed on October 5, 2018 (First RFJN),
16 Exhibit C at p. 19 (Agenda Item 4.5(b).) After acknowledging that the Project is the "whole of the
17 action" and not just the Streambed Alteration Agreement, Petitioners may not change tack and claim
18 that only the mitigated negative declaration ("MND") applies because the State allegedly reviewed
19 only the MND during its process. (*See* Renewed Motion at 9-10.)

20 An initial EIR on a project must be challenged within 30 days after the notice of
21 determination and cannot be challenged later under the guise that subsequent or supplemental EIR is
22 required. (*A Local & Regional Monitor (ALARM) v. City of Los Angeles* (1993) 12 Cal.App.4th
23 1773, 1794.) Here, this Project was reapproved based on the 2015 EIR. No-one challenged that
24 environmental review, including Petitioners. The present lawsuit effectively and impermissibly
25 attempts to do so now.

26 When the environmental document is an EIR, the agency's subsequent review determination
27 is reviewed under a highly deferential test. (*Citizens Against Airport Pollution v. City of San Jose*
28 (2014) 277 Cal.App.4th 788, 797 & 804.) The agency's determination that further EIR is not
required will be upheld if supported by substantial evidence. (*Id.* at 804.) The challenger must show
that the agency's determination is not supported by substantial evidence. (*Id.* at 798.) (*See also*

1 Stephen L. Kostka et al., *Practice Under the California Environmental Quality Act* (“Kostka”)
2 (CEB, 2nd ed. 2019) §19.55.) That standard applies here.

3 *Benton v. Board of Supervisors* (1991) 226 Cal.App.3d 1467, is a correct statement of the
4 law “insofar as it recognizes that negative declarations, like EIRs, are entitled to a presumption of
5 finality.” (*Friends of College of San Mateo Gardens*, 1 Cal.5th at 958 n.6.) The High Court
6 cautioned that “‘a court should tread with extraordinary care’ before reversing an agency
7 determination, whether implicit or explicit, that its initial environmental document retains some
8 relevance to the decisionmaking process.” (*Id.* at 953.)

9 **C. The Streambed Alteration Agreement did not involve a discretionary approval in 2018.**

10 The California Supreme Court cautioned that “‘a court should tread with extraordinary care’
11 before reversing an agency determination, whether implicit or explicit, that its initial environmental
12 document retains some relevance to the decisionmaking process.” (*Friends of the College of San*
13 *Mateo Gardens v. San Mateo County Community College Dist.* (2016) 1 Cal.5th 937, 953.) It is
14 evident under any standard of review that in 2014 the Mitigated Negative Declaration “expressly
15 agreed the City would abide by conditions imposed on it in SAA, and that decision was final.”
16 (Order at 7:5-6.) Similarly, the City’s readoption of the Project in 2015 under an EIR, with the same
17 approval of terms of the Streambed Alteration Agreement, was final. (First RFJN Exh. C; Second
18 RFJN Exh. I at p. 2-2; & *id.* at Exh. M.) Because there was no more discretionary approval required
19 from the City for applying for and entering into the Agreement, there was no occasion to reopen
20 environmental analysis at any point after that to implement the Project—already approved by the
21 City Council in 2014 and 2015.

22 **1. Executing the Streambed Alteration Agreement in 2018 is not a subsequent**
23 **discretionary approval requiring additional CEQA analysis because the terms**
24 **were already approved in 2014.**

25 The Petition for Writ of Mandamus alleges that “CDFW and the City abused their discretion
26 and failed to act in the manner required by law in entering into the discretionary Streambed
27 Alteration Agreement” (Petition at ¶25.) While unclear, Petitioners appear to argue in their
28

1 motion that the City allegedly violated CEQA when it applied for the Agreement, without first
2 conducting an EIR. (*See* Renewed Motion at 8:24-26.) Petitioners’ argument is without merit.

3 CEQA applies only to discretionary approvals. (Pub. Res. Code §21080(a).) “If, under the
4 applicable substantive law, an agency's approval is ministerial rather than discretionary, evaluation
5 of environmental impact is unnecessary and CEQA does not apply.” (*Friends of Juana Briones*
6 *House v. City of Palo Alto* (2010) 190 Cal.App.4th 286, 299.) (quotation marks omitted)

7 CEQA defines the term “project” broadly. (*Moss v. County of Humboldt* (2008) 162
8 Cal.App.4th 1041, 1056.) “Under CEQA, a project is ‘the whole of an action’ that has the potential
9 to affect the environment; it is defined based on the activity undertaken and not on actions by
10 governmental entities concerning its approval.” (*Id.*) A new government action does not convert an
11 existing project into a new one: “[I]t is clear that **new government action taken with respect to**
12 **the same activity** for which approval is sought does not convert that activity into a new project for
13 purposes of CEQA review.” (*Moss*, 162 Cal.App.4th at 1056.) (emphasis added) The Guidelines
14 define the term “project” as “the whole of an action,” and explain: “The term ‘project’ refers to the
15 activity which is being approved and which may be subject to **several discretionary approvals by**
16 **government agencies**. The term ‘project’ **does not mean each separate governmental approval**. .
17 . . .” (Guidelines §15378.) (emphasis added) In light of the above, the City Council’s 2014 approval
18 to enter into a Streambed Alteration Agreement and abide by its terms was part of the 2014 approval
19 of the Project.

20 The Project consists of demolition of a trestle spanning the Los Gatos Creek and replacing it
21 with a steel truss pedestrian bridge. (*See* Order at 6:28-7:2.) (*See also* Second RFJN, Exhibit I at p.
22 2-1.) This requires a number of permits to be issued by various government agencies. (Second RFJN
23 Exhibit I at at p. 2-2; First Brown Decl. at ¶3.) As this Court determined on Petitioners’ previous
24 motion for a preliminary injunction, the City’s securing the permits required for implementation of
25 the Project was part of the City’s Project approval. (Order at 7:2-11.)

26 When the City approved the Project in 2014, it knew it needed a Streambed Alteration
27 Agreement to implement the Project, as required by Fish and Game Code section 1602. When
28 determining whether to grant or deny this Agreement, the California Department of Fish and

1 Wildlife considers adverse effects to fish and wildlife resources from a given project. (Fish & G.
2 Code §1602(a)(4).) The Code requires the Department to either determine that the proposed activity
3 will not substantially adversely affect an existing fish or wildlife resource, or to issue an agreement
4 with reasonable measures to protect the resource. (*Id.*)

5 Recognizing that such an Agreement was required for Project implementation, the City
6 analyzed the Project's potential environmental impacts on the biological resources in Los Gatos
7 Creek when it approved the Project in 2014 (Second RFJN, Exhs. E through G) and when it
8 reapproved it in 2015. (Second RFJN, Exh. I at pp. 3-12 through 3-28; & Exh. J.) Thus, the City's
9 2018 application to the State for a Streambed Alteration Agreement did not trigger CEQA because it
10 was an administrative process implementing the City Council's approval of the Project in 2014 and
11 2015.

12 The City's discretionary approvals took place in 2014 when the City prepared the Mitigated
13 Negative Declaration and approved the Project. (Order at 7:2-13.) (*See also* Second RFJN Exhibits
14 F & G.) The City subsequently took discretionary action again in 2015, when it approved the EIR
15 and reapproved the Project. (First RFJN Exh. C; & Second RFJN Exhs. I through M.) The City
16 Council committed the City to the Project when it approved the construction contract in 2014 and
17 2015. These were the discretionary approvals requiring CEQA analysis by the City. As part of the
18 environmental analysis for the MND and EIR, the City analyzed the considerations for a streambed
19 alteration permit as a necessary part of the Project, and there has been no subsequent City approval
20 requiring the City to re-analyze the same issues. (Second RFJN, Exhs. E through G; Exh. I at pp. 3-
21 12 through 3-28; & Exh. J.)

22 Contrary to Petitioners' argument, the City made no discretionary approvals in connection
23 with the Streambed Alteration Agreement in 2018 that would trigger supplemental CEQA analysis.

24 **2. The terms of the Streambed Alteration Agreement were not negotiated.**

25 To the extent that Petitioners contend that the City's email correspondence with the California
26 Department of Fish and Wildlife regarding the SAA constitutes discretionary action under CEQA,
27 they are wrong.

28

1 While the Fish and Game Code refers to the resulting document as an “agreement,” there is
2 no arm’s-length negotiation of its terms. (*See* Fish & G. Code § 1602(a).) It is the State that
3 determines whether project implementation will adversely affect a fish and wildlife resource, and if
4 so, the State determines if protective measures during construction are necessary. (Fish & G. Code
5 §1603(a).) Under section 1603, the applicant’s power during that process is limited to simply
6 objecting to protective measures. (Fish & G. Code §1603.) The CDWF ultimately determines the
7 terms and conditions of the permit. The applicant’s only right is to be heard by the State in objection
8 to those terms and to arbitrate the duration of the “agreement.” (*Id.*)

9 This is nothing more than a permitting process. The applicant is prohibited from proceeding
10 with a project without the required permit. (*See* Fish & G. Code § 1602(a).) While the State has
11 discretion to deny the permit or impose conditions on its issuance, the Fish and Game Code
12 governing that permit process only allows applicants to object to terms proposed by the State and
13 seek their review through an administrative appeal. (*See* Fish & G. Code §1603.)

14 There was no negotiation of this Agreement, and its terms and conditions were set by the
15 State. (First Brown Decl. at ¶¶ 4-8; Second Brown Decl. at ¶¶7-13.) The Agreement simply sets
16 forth the terms and conditions with which the City must comply as conditions of being allowed to
17 work in the Creek. (*See* Second RFJN Exhibit N.) The City’s signature on the Agreement does not
18 reflect any contractual arms-length negotiation, but rather, the City’s pledge to abide by its terms.

19 Even if the Agreement had been negotiated as Petitioner claims, its terms were approved by
20 the City Council in 2014 and 2015, as explained in Part III.C.1 above, and no further discretionary
21 approval was required in 2018.

22 **3. The issue of the trestle’s historic status was extensively analyzed in the 2015**
23 **EIR and remained unchallenged so it was not new information or substantial**
24 **change circumstances of the Project in 2018.**

25 Petitioners argue that if there is an additional discretionary act and there is new information
26 or circumstances that were not previously studied, additional environmental review is required
27 under Public Resources Code section 21166. (Renewed Motion at 5.) Neither of these circumstances
28 exist here. As explained above, the City did not make any discretionary approval in 2018 that would

1 trigger additional CEQA review. As a result, section 21166 is not implicated. Even if it were, the
2 City studied whether the trestle is historic both in the MND and the EIR, and the public had ample
3 opportunity to provide input regarding that issue.

4 The previous CEQA lawsuit of Petitioner Friends, filed in 2014, made the trestle's historic
5 status its central issue when it challenged the City's determination that the trestle was not historic.
6 That determination was eventually upheld. (*See* Part II.2 *supra*.) The City's 2015 EIR analyzed the
7 trestle's potential historic status in detail. (First RFJN, Exh. B at ¶5 & accompanying exhibit A;
8 Second RFJN, Exhibit I at pp. 3-28 through 3-32.) The 2015 EIR remains unchallenged and the time
9 to do so has long passed. (Public Res. Code §21167(c).) (CEQA's 30-day period of limitations for
10 challenging an EIR)

11 **D. The balance of harms weighs against a preliminary injunction.**

12 **1. Petitioners' burden to show irreparable injury is heavier when injunctive relief**
13 **is sought against a public entity.**

14 A plaintiff who seeks an injunction against a public entity bears a heavier burden than a
15 plaintiff under other circumstances:

16 Where, as here, the defendants are public agencies and the plaintiff seeks to restrain
17 them in the performance of their duties, **public policy considerations** also come into
18 play. There is a **general rule against enjoining public officers or agencies** from
19 performing their duties. This rule would not preclude a court from enjoining
20 **unconstitutional or void acts**, but to support a request for such relief the plaintiff
21 must make a **significant showing of irreparable injury**.

22 (*Tahoe Keys Property Owners' Assoc.*, 23 Cal.App.4th at 1471) (citations omitted) (emphasis
23 added).

24 The City Council approved the Project and the means of its implementation, including the
25 Streambed Alteration Agreement. (*See* Part III.C.1 *supra*.)

26 The City of San Jose has owned the trestle since 2011. (Second RFJN, Exh. K at p.2.) The
27 City bought the right of way to include it in the Three Creeks Trail, a unique trail system with multi-
28 trail connectivity. (*Id.* at ¶6.) The City has been working on that Project since about 2003. (*Id.*) The
trestle was in a degraded state even when the City acquired it in 2011. (City of San Jose's Request
for Judicial Notice in Opposition to Renewed Motion for Preliminary Injunction ("Third RFJN"),

1 Exh. O at ¶¶7-9.) In 2014 it had rotted timbers and parts of it were burned. (*Id.* at ¶¶10-12 &
2 exhibits E through G thereto.)

3 City consultant Jacobs Engineering visited the trestle site in February 2019, and as recently
4 as June 5, 2019, and noted significant deterioration of the trestle, including deterioration of ties (i.e.
5 pieces of timber spanning the width of the trestle parallel to the creek banks); missing ties; fire
6 damage; bent and damaged railing posts along both edges of the trestle; warped metal grating at the
7 edge of the trestle's deck, likely from fire and vandalism; significant damage to timbers supporting
8 the metal grating; and deterioration of the trestle's stringes (i.e. wooden beams running the length of
9 the trestle that constitute the main structural support for its deck). (Declaration of Dave von Rueden
10 at ¶¶3-17 & Exhs. A through H thereto.) Jacobs Engineering also noted that the trestle acts as a dam
11 on the Creek because it collects debris upstream, and has collected several large trees since the
12 winter of 2016-2017. (*Id.* at ¶¶4 & 7, & Exh. A thereto.) Such stream flow conditions likely cause
13 erosion and scour at the existing timber piles; piles are also subjected to battering from large debris
14 and hydraulic forces due to debris loading. (*Id.* at ¶7.)

15 The Willow Glen Neighborhood Association supports this Project and is in favor of
16 removing the wooden trestle and installing a steel pedestrian bridge. (Third RFJN, Exh. O at ¶14 &
17 exhibit H thereto.)

18 **2. The City would suffer irreparable harm if it is unable to complete the Project at**
19 **this time.**

20 The City Council awarded a contract to construct the Project to Gordon N. Ball, Inc. (Second
21 Brown Decl. at ¶4.) Under permit conditions, the Project work in the Creek may only proceed
22 between June 15 and October 15. (*Id.* at ¶20.) Last year, the delay caused by the present litigation,
23 including Petitioners' previous motion for preliminary injunction, prevented the City from working
24 on the Project in October 2018. (*Id.* at ¶¶15-17.) After the State issued the Streambed Alteration
25 Agreement on October 4, 2018, the City had all permits required for the Project construction work.
26 (*Id.* at ¶15.) The work window in all permits expired on October 15, 2018. (Second Brown Decl. at
27 ¶15.) Although the City was not permitted to perform construction work until October 4, 2018, the
28 City intended to complete as much work as possible within the eleven days remaining to October

1 15, 2018. (*Id.* at ¶16.) The City’s consultant had completed the Preconstruction Work phase
2 (biological studies), and Gordon N. Ball, Inc. was scheduled to begin the Mobilization/Site
3 preparation phase on October 8, 2018. (*Id.*)

4 When the October 11, 2018, order denying preliminary injunction issued, only four days
5 remained until the expiration of the allowed work-period. (Second Brown Decl. at ¶17.) That was
6 insufficient time for the City’s contractor to mobilize crews to begin work. (*Id.*) The City applied for
7 extensions of its permits. (*Id.*) The United States Corps of Army Engineers did not allow the City’s
8 contractor to work past the permit October 15, 2018 deadline. (*Id.*) The City’s contractor was thus
9 unable to begin work on the Project in 2018. (*Id.*)

10 The City now has to wait to start work until June 17, 2019. Mobilization and site preparation
11 is scheduled to start on June 17, 2019 and to complete within one week. (Second Brown Decl. at
12 ¶21.) Demolition of the trestle is scheduled to start on June 24, 2019, and to complete within one
13 week. (*Id.*) Installation of the new bridge is scheduled to start on July 1, 2019, and to complete in
14 fourteen weeks. (*Id.*) Work on the Project is expected to continue until October 15, 2019, or shortly
15 before then. (*Id.* at ¶¶22-26.)

16 The City, and ultimately the City’s taxpayers, incurred the following significant costs related
17 to the Project to date: EIR (consultant and City staff costs from 2014 to 2016) of over \$561,000;
18 consultant fees paid to date for administrative support, construction management support, and
19 permit extensions of over \$117,000; and construction contract amount paid to date of over
20 \$400,000, in addition to staff time spent from 2014 to the present. (Second Brown Decl. at ¶14.)

21 Additionally, because Project work could not be performed in 2018, the City incurred over
22 \$269,000 in unnecessary costs: payment for contractor’s mobilization and demobilization of
23 \$50,000; contractor’s delay costs of \$75,000; consultant’s delay costs of \$119,000; and additional
24 staff time of over \$25,000. (Second Brown Decl. at ¶18.)

25 In the meantime, the public has been deprived for years of the ability to enjoy a complete
26 and safe Three Creeks Trail for recreation. Moreover, according to a City trail count, 53% of the
27 users of the Guadalupe River trail have done so to commute. (Third RFJN, Exh. O at ¶22.) the
28 replacement of the trestle will significantly increase the connectivity of the trails, improve access to

1 Willow Glen's popular Lincoln Avenue, and reduce time spent on public roadways to travel by bike
2 and foot. (*Id.* at ¶22 & ¶¶6-7.) As a result, delays in the Project mean that there are more people in
3 cars and thus more air pollution than there would be otherwise.

4 **IV. CONCLUSION**

5 The City respectfully requests the Court not to countenance Petitioners' attempt to reargue
6 the same motion this Court already denied in October 2018. The facts, circumstances, and the law
7 remain unchanged since that time, and warrant the same result.

8 The City requests the Court to deny Petitioners' request for a preliminary injunction.

9 Respectfully submitted,

10 Dated: June 6, 2019

11 RICHARD DOYLE, City Attorney

1 **PROOF OF SERVICE**

2 CASE NAME: Willow Glen Trestle Conservancy, et al v. City of San Jose, et al.

3 CASE NO.: 18CV335801

4 I, the undersigned declare as follows:

5 I am over 18 years of age and not a party to this action. My business address is 200 East
6 Santa Clara Street, San Jose, California 95113-1905, and is located in the county where the service
described below occurred.

7 On June 6, 2019, I caused to be served the within:

8 **CITY OF SAN JOSE'S MEMORANDUM OF POINTS AND AUTHORITIES IN**
9 **OPPOSITION TO RENEWED MOTION FOR PRELIMINARY INJUNCTION**

10 by ELECTRONIC SERVICE listed below, transmitted using the One Legal Process Service
11 electronic filing system. The document(s) listed above was/were electronically served to the
12 electronic address(s) below

13 Addressed as follows:

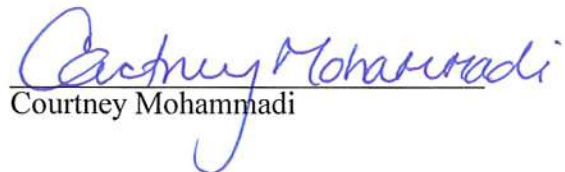

13 Ms. Susan Brandt-Hawley
14 Brandt-Hawley Law Group
15 P.O. Box 1659
16 Glen Ellen, CA 95442
17 Phone Number: (707) 938-3908
18 Fax Number: (707) 576-0175
19 Email: susanbh@preservationlawyers.com
