

Open letter to City of San Jose

Preserve - maintain (something) in its original or existing state.

The 1921 Western Pacific Trestle should be preserved for use by residents and visitors in San Jose.

The thrill you get standing over the Los Gatos Creek on the wooden beam structure provides a strong connection between today and yesterday, modern and old-fashion, functional and fun.

This architecturally unique structure merits a careful review and public input.

These residents within North Willow Glen and Gregory Plaza neighborhoods want SJ City Council to reconsider the removal of this trestle and engage in appropriate public outreach regarding this project.
